

Performance Exhaust Wrap

- EXCELLENT THERMAL INSULATION
- SUITABLE FOR TEMPERATURES TO 550 C

Description

Performance Exhaust wrap is manufactured from fine uniform textured filaments of E type glass fibre yarns. The fibres are inorganic, sterile and incombustible as well as being resistant to oils, solvents and most chemicals. They also have a low level of leachable chlorides and fluorides.

They have excellent thermal insulation properties and are suitable for temperatures up to 550°C.

Applications

Performance exhaust wrap is suitable for use as thermal insulation to tubular exhaust manifolds & pipes to help reduce under bonnet temperatures, increase horsepower and improve fuel efficiency.

The wrap offers substantial protection against burns and fire hazards and can be used for all exhaust applications within the automotive, marine and generator set industries.

Performance Exhaust Wrap

Thickness (mm)	Width (mm)	Roll Length (m)
1.5	25-150	30
3.0	25-150	30

Cheshire Ribbon can also manufacture a wide range of E glass wraps to suit your specific requirements, subject to minimum quantities. Please contact us on 0161 368 2048 or email sales@cheshireribbon.co.uk for more information.
