

Chopped Strand Mat

- * No fuzz, dirt or impurities
- * Fast wet-out
- * Even thickness
- * Good covering and degassing properties
- * High mechanical strength and high wet strength retention

Chopped strand mat is made from E-glass fibre strands chopped to different lengths and bonded in one of two ways - either powder or emulsion. It is the most common form of reinforcement.

Chopped strand mat is used primarily for hand lay-up processes, filament winding and press moulding of FRP products including bathroom accessories, pipes, automobiles and other building applications.

Resintex offer chopped strand mat in 450 and 600 gm / m² weights and can cut to any width required.

For powder bonded CSM use Epoxy Resin
For emulsion bonded CSM use Polyester Resin
