

## Fibreglass Mesh

- \* Excellent stability, strength and cohesion
- \* Alkali-resistant
- \* Durable for over 50 years

Fibreglass Mesh Resintex fibreglass mesh is coated with acrylic acid copolymer liquid and is therefore water, alkali and aging resistant. The mesh has high tensile strength, good dimensional stability, good elasticity, capillary action and corrosion resistance.

It is widely used for layout, coating or mechanically formed GRC and reinforcing panels, flat board, mobile homes, duct panels, cable boxes granaries, water tanks and bath tubs. It is also used in roof waterproofing and gypsum, marble and mosaic wall reinforcement. It is an excellent reinforcing material for internal and external wall insulation systems. It can reinforce walls and prevent cracking.

The mesh is 50m in roll length and can be offered in a wide range of widths from 25mm to 1000mm to suit your particular application. Please contact us on 0161 368 2048 or email [sales@cheshireribbon.co.uk](mailto:sales@cheshireribbon.co.uk) for more information.

### Order Details:

To ensure that your requirements are correctly fulfilled please state:

- \* Width of Tape
- \* Number of Rolls
