

Surface Tissue

- * Smooth surface
- * Good distribution
- * High tensile strength and abrasion characteristics

Surface Tissue Resintex surface tissue is a thin e-glass fibre mat (tissue like in appearance and texture) used to cover the more coarse surfaces of chopped strand mat and other FRP products. It is capable of significantly increasing the strength and uniformity of the surface of FRP products.

Resintex surface tissue is 30gm / m² in weight and comes in 500m lengths and can be cut to different widths to suit the application it is used for.

For more information, please contact us on 0161 368 2048 or email sales@cheshireribbon.co.uk.

Order Details

To ensure that your requirements are correctly fulfilled please state:

- * Width of Surface Tissue
- * Number of Rolls
